<u>Constraints</u>
Last Modified: 1 April 2012

- The application will work on Visual Studio.
- The library is programmed in the C language.
- Our team has limited domain knowledge.
- The comparison function will be limited because we do not have access to a large amount of normal scans.
- The diagnosis function will be limited because we lack a large number of abnormal scans and knowledge to diagnosis multiple abnormalities.

No more constraints have been identified at this time.
